---

## Education

Glasgow Caledonian University - **BSc (Hons) Computing, 2016-2018, 2:1**

Glasgow Clyde College - **HND Software Development, 2015-2016, A**

---

## Experience

**Spartan Solutions - October 2018 > June 2020**

**Software Engineer - C# (.NET), JavaScript, SQL**

- Designed, implemented, tested and released custom mobile & web solutions for a global aerospace company. Working closely with their product team, including end of sprint show & tells and incorporating their feedback.
- Providing customers with technical support, debugging live issues and determining infrastructure problems and helping customers resolve issues.
- Designed, implemented, tested and released many projects to multiple customers with assorted deployment methods and integration solutions.
- Implementing automated end-to-end testing with a focus on making my software as robust as possible.
- Improved numerous parts of the infrastructure - from automated testing in Jenkins CI to automating iOS app builds, as well as improving developer functionality. All of this speeding up our devops.

**Airpoint International - July 2020 > September 2023**

**Software Engineer - Java, Kotlin, JavaScript (TypeScript, Angular), SQL**

- Successfully delivered a prototype as technical lead - focusing largely on rapid prototypes & implementing customer feedback, working closely with our project manager.
  - Mentored a junior developer - helping them learn our codebase, showing them best practices and advanced programming techniques.
  - Provided help and guidance to other developers, particularly in areas I have a high level of expertise.
  - Aided our QA analyst implementing automated frontend end-to-end testing.
  - Focused on improving the UX/UI and provided rapid UI prototypes with Figma for potential new projects.
- 

## Other Areas of Expertise

- Involvement in the full development lifecycle, from design requirements through to release.
- Supporting non-technical operations such as planning, reviews & project proposals.
- Excellent team working skills and good communicator.
- Driven, flexible and autonomous in a highly dynamic environment.
- Picking up new skills, both technical and non-technical.
- High level of attention to detail - taking pride and ownership of my work.
- Level 3 NPPV/SC.
